New German Software Solves Windows® Search Issues on Standard and Virtual Desktops

Lookeen offers a streamlined desktop search solution for all Windows users

KARLSRUHE, Germany - March 16th, 2015 - Leading European Outlook® search solution provider Lookeen announced the release of a new alternative to Windows Desktop Search today. The newest version of Lookeen is smoother and faster than ever, and expands upon Lookeen's core competencies with desktop and Outlook search. The user friendly, unified interface gives instant feedback with search as you type returns and advanced filtering options on standard and virtual desktop clients.

Windows Desktop Search made better with Lookeen 10

The stand-alone desktop search tool is a comprehensive, easy to use search solution for all Windows users. With faster indexing, faster search returns, and brand new preview, filter and editing features, Lookeen enables users to quickly and effectively manage critical data for more productive and better informed work.

For the first time ever, Lookeen enables users to edit documents right from within their desktop search tool. The improved preview feature not only provides users with a full fidelity preview of all document types, but also allows text files like Microsoft Word and Excel to be edited and saved from within Lookeen.

Enterprise solutions are made easy with connection to the separately available Lookeen Server, roll out following the Active Directory and continued support of multiple virtual desktop solutions.

Keeping the core users in mind

With a legacy of excellence in Outlook search in mind, the updates to Lookeen have focused on improving the already strong desktop search tool, while remaining true to its roots.
"Lookeen as a stand-alone desktop solution is a natural progression for us. Lookeen was built from the ground up with our end users in mind and with their feedback guiding development. We've built many features into Lookeen 10 that were beloved features of other, now defunct, desktop search tools, simply because potential customers told us that they miss them. We figured out that if you give the customer what they want, they will be your best cheerleaders. We've done that with Lookeen 10." Martin Welker, CEO at Axonic Informationssysteme GmbH.

Features:

- Compatible with Windows 10, 8, 7 and Vista
- Citrix, VMware, and Terminal Server compatible
- Optional add-in to Microsoft Outlook 2013, 2010, 2007 or 2003
- Unified search of local, network or Exchange Server data
- Multiple file types supported
- Edit and save changes in full fidelity preview
- Advanced search queries using filters, wildcards, Boolean and proximity search
- Enterprise-wide solution available with connection to Lookeen Server
- Follows group directives for simplified roll out

Lookeen is used by professionals in over 25,000 companies across more than 100 countries. A full version can be tested for free for a 2 week period. Download Lookeen for Windows at www.lookeen.com. Volume discounts available for business and enterprise solutions.
